

Sunday, 1 September 2002 - 14:00-18:00 Riga (Green Zone)

**CARDIAC COMPUTED TOMOGRAPHY: SOMETHING NEW
ON THE HORIZON?**

Abstracts

Chairpersons: S. Achenbach (Erlangen, DE); P.J. de Feyter (Rotterdam, NL)

- | | | |
|-------|--|-----|
| 14:00 | The MUNICH registry: "normal" distribution of coronary artery calcium measured by 4-slice computed tomography in over 2000 asymptomatic individuals.
– S. Silber, A. Schmermund, R. Erbel (Essen and Munich, DE) | 873 |
| 14:15 | Calcium score as assessed by multislice computed tomography does not predict maximal coronary artery stenosis: an in-vitro study.
– M. Frick, F. Karakolcu, H. Gschnitzer, A. Stoeger, G.J. Friedrich, F. Weidinger, O. Pachinger, S. Schwarzacher (Innsbruck, AT) | 874 |
| 14:30 | Impact of the heart rate on multislice computed tomography coronary angiography.
– K. Nieman, B.J. Rensing, R.-J. Van Geuns, P.M.T. Pattynama, P.J. de Feyter (Rotterdam, NL) | 875 |
| 14:45 | Conventional risk factor analysis versus coronary calcification scanning in patients presenting in the emergency department with chest pain.
– D.A. Laudon, K.V. Ballman, L.F. Vukov, J.F. Breen, A.S. Terry, P.F. Sheedy, T. Behrenbeck (Rochester, US) | 876 |
| 15:00 | Changes in both left- and right ventricular volumes and function after passive cardiomyoplasty assessed by electron beam computed tomography.
– A. Lembcke, T.H. Wiese, S. Dushe, H. Hotz, C.N.H. Enzweiler, B. Hamm, W. Konertz (Berlin, DE) | 877 |
| 15:15 | Multislice computed tomography contrast enhanced imaging of arterial and venous coronary artery bypass grafts.
– R. Raipancholia, M. Al-Bustami, R. Chambers, J.B. Partridge, A.G. Mitchell, M. Amrani, C.D.J. Ilesley (Harefield and Middlesex, GB) | 878 |
