

■ 11:00–16:00 | Best Posters screen - Poster Area

BEST POSTERS 1

Discussant intervention 12:35–13:25

Best Posters

Best Posters are on display from 11:00 to 16:00 on the Best Posters plasma screen of the related topic. During the viewing time (12:35–13:25), a discussant will visit the presenters to animate discussions, the screen will be shared in 4 parts and each poster will take, in turns, full screen to allow time for Poster discussion.

BEST POSTERS IN NUCLEAR CARDIOLOGY

Discussant: Best Posters in nuclear cardiology.

P581

– A. Saraste (Turku, FI)

Post-stress transient ischaemic dilatation with normal perfusion seen on single-photon emission computed tomography myocardial perfusion imaging using a cadmium-zinc-telluride camera. **P582**

– M.S. Yew, W.S.J. Ong (Singapore, SG)

Long-term prognostic value of non-invasive anatomic and functional imaging tests. **P583**

– D.C. Benz, L. Gaemperli, C. Grani, M. Messerli, A.A. Giannopoulos, R.R. Buechel, O. Gaemperli, P.A. Kaufmann, A.P. Pazhenkottil (Zurich, CH)

Side effects of regadenoson replacing adenosine for pharmacological stress tests in real world: prospective evaluation in over 5000 patients. **P584**

– M. Keller, M. Rippel, S. Silber (Munich, DE)

Hybrid positron emission tomography-magnetic resonance imaging and speckle tracking echocardiography to detect early cardiac involvement function in females carrying alpha-galactosidase a mutation. **P585**

– L. Spinelli, M. Imbriaco, C. Nappi, E. Nicolai, G. Giugliano, A. Ponsiglione, T.C. Diomaiuti, E. Riccio, A. Pisani, B. Trimarco, A. Cuocolo (Naples, IT)

ESC Congress

Munich 2018

25-29 August

Where the world of
cardiology comes together
